

Burning Shadows

© 2011 Mechanization | www.mechanization.us

You will see the ring
No change will stop the light that burns the meat
Forsake the things that end society
For we honor the strength that brings us peace
The same technology that saves us
May just bring us to our knees
For all to pay the blank receipt
So we hear the burning shadows speak

I cannot stop what is happening
What's created won't sleep
We're all destined to repeat
And these burning shadows keep haunting me
I can't believe all the death I see
We've ignited the heat
I see the fate that doesn't bleed
Cuz these burning shadows keep waking me

Free men breathing
Before the tragedy will burn the air in a shockwave blast
With no bleeding
We can't prevent the scene from fire and dust to define our past

I cannot stop what is happening
What's created won't sleep
We're all destined to repeat
And these burning shadows keep haunting me
I can't believe all the death I see
We've ignited the heat
I see the fate that doesn't bleed
Cuz these burning shadows keep waking me
